- LIGHTNESS AND TOUGHNESS
- HIGH PERFORMANCES
- REDUCED OVERALL DIMENSION
- FASTER ASSEMBLY

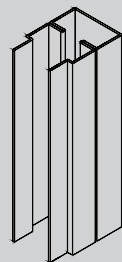

COMPATIBLE ACCESSORIES

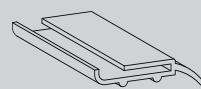

Aluminum bottom guiderail

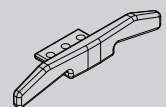

Aluminum guiderail

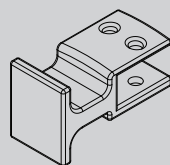

Steel guiderail

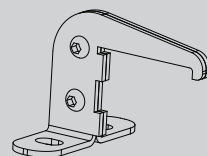

Coextruded gasket for guiderail

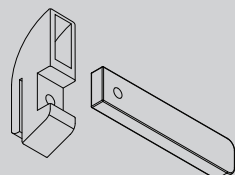

Lateral caps

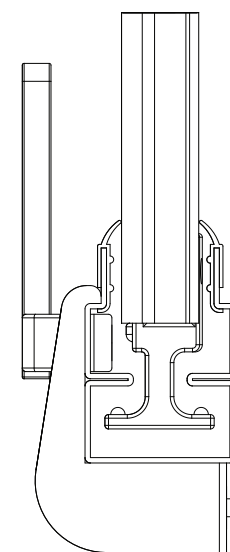

Windproof hook

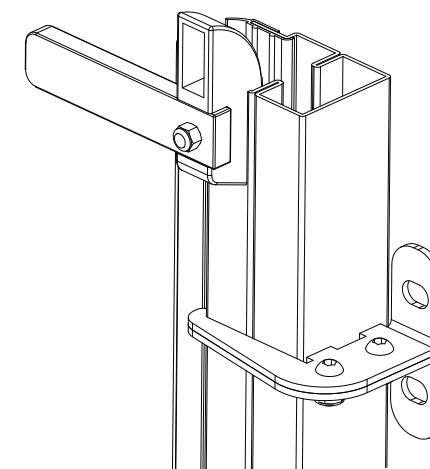

Bracket for guiderails

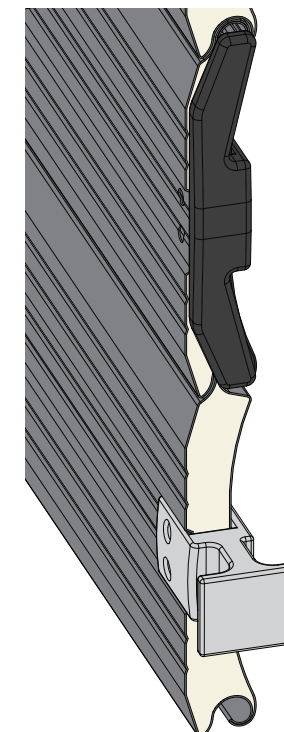

Pilot hole for guiderail

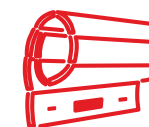

INSTALLATION PILOT HOLE AND GUIDERAIL

INSTALLATION STOPPER AND
BIDIRECTIONAL WINDPROOF HOOK

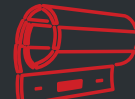

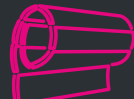

TECHNICAL CHARACTERISTICS

	C110 STEEL	L110 ALUMINIUM
Nominal dimensions	21,5x110 mm	21,5x110 mm
Slats per 1 m. of height	n°9	n°9
Weight/sq. m medium density	c.a. 7,5 kg	c.a. 4,9 kg
Weight/sq. m high density	c.a. 9 kg	c.a. 6 kg

Shutter unit compliant to CPR 305/2011 - Safety requirements UNI EN 13241:2016

Wind resistance test in accordance with UNI EN 12444 - thermal transmittance in accordance with UNI EN ISO 10077-2:2012 ACMI procedure approved

- **LIGHTNESS AND TOUGHNESS**
- **HIGH WIND RESISTANCE**
- **HEAT INSULATION**

Bidirectional windshield hook made of high strength composite material that guarantees high performance at low cost;

New guiderail, innovative design with reduced overall dimension compared to existing guides;

Assembly much faster and cheaper as the caps and windproof hooks are overlapping mounted.
